Notes for Contributors to Isis

1) Manuscripts submitted for publication in ISIS should be typewritten on one side of the sheet only, double-spaced.

2) Italic type should be used for the titles of books, periodic publications, and manuscripts; and also for all technical terms and phrases not in the language of the article. Such words, phrases, titles, or passages, should be *underlined* in the typescript. Quotations in foreign languages within quotation marks should *not*, however, be italicized.

3) Quotations in any language that are more than seven or eight lines will be printed in small Roman type. This should be indicated in the typescript by indenting the whole extract six spaces.

4) No periods should be used following the symbols Mr, Mrs, Mme, Mlle, Msgr, Dr, St, Ste, MS, MSS.

5) All dates should be written with the day first, then the month, and then the year, e.g., 14 June, or 21 September 1947.

6) The following words, abbreviations, and phrases, should not be italicized: col. (cols.) cf., etc., e.g., i.e., p. (pp.). The following, however, *should* be italicized: *ante*, *circa* (*ca.*, *C.*), *infra*, *supra*, *ibid.*, *idem*, *et al.*, *loc. cit.*, *op. cit.*, *passim*, *post*, *versus* (*vs*), *vide* (*v.*), *viz.*

7) Footnotes should be indicated by superior numerals, beginning with 1 and running sequentially *through the whole article*. Do not use asterisks, daggers, double daggers, etc.

8) If the article calls for special characters other than the accent marks of French, German, or Spanish, a list of all such characters should be included with the article on a separate sheet. Authors of articles containing a very large number of special characters or an exceedingly large amount of text material in foreign languages will be expected to share the extra cost involved in such special printing.

9) The amount of bibliographical detail to be included in references is left to the discretion of each contributor. In referring to very rare works, however, contributors are urged to give full bibliographical data and, if possible, a glossy print of the title page of the book, for reproduction in the article.

In giving references to books, the *title* of the book should be italicized. Two sample references are given below:

> Iago Galdston, *Behind the sulfa drugs: a short history of chemotherapy* (New York: D. Appleton-Century Company, 1943), p. 27.
>
> E. Cassirer, *Das Erkenntnisproblem in der Philosophie und Wissenschaft der neueren Zeit* (2nd ed., Berlin: Verlag Bruno Cassirer, 1911), vol. 1, p. 27.

References to articles in periodicals should have the title of the article in Roman, with the *title of the periodical* in italics; the volume number should be given in Arabic numerals, *underlined* so that it will be printed in italics; the volume number, year, and page or pages should be indicated clearly; two sample forms of reference are given below:

> Fulton, J. F., and Cushing, H. A bibliographical study of the Galvani and the Aldini writings on animal electricity. *Annals of Science*, 1936, *1*: 239–268.
>
> J. Walter Wilson, Dutrochet and the cell theory, *Isis*, *37*, 14–21, 1947.

10) In the first reference the title should be given in full, but in succeeding references an abbreviated title should be used. Ordinarily, such abbreviations as *loc. cit.* should not refer further back than one or two pages.

11) The funds of the History of Science Society do not admit of an expenditure of over 5 per cent. (5%) of the cost of composition for changes in articles made by the author after the article has been set up in galleys. Any additional expense for authors' corrections must be borne by the author. In order that contributors may be spared the expense exceeding this allowance, they are urged to prepare their manuscripts as carefully as possible.

12) Authors of articles will be allowed four line-cut illustrations, not to exceed four inches square. Anything above that, and all half-tones, will be printed at the authors' expense.

13) Reprints of articles will be supplied at the authors' cost.

(*Additional Notes for Book Reviewers will be found on the following page.*)

14) Book reviews should be written in the same style as articles. The book should be described at the beginning of the review according to whichever of the following samples is pertinent:

JAMES B. CONANT: *On Understanding Science, an Historical Approach.* (The Terry Lectures). xv+145 pp., 10 figs. New Haven: Yale University Press, 1947. $2.00

MARJORIE NICOLSON: *A World in the Moon.* A study of the changing attitude toward the moon in the 17th and 18th centuries. v+72 pp., 1 pl. Northampton: Department of Modern Languages of Smith College, 1936. (Smith College Studies in Modern Languages, vol. 17, no. 2).

PAUL TANNERY: *Pour l'histoire de la science hellène. De Thalès à Empédocle.* 2nd. ed. by A. Diès, with a preface by F. Enriques. xxiv+435 pp., port. Paris: Gauthier-Villars et Cie, 1930.

M. F. ASHLEY MONTAGU (editor): *Studies and Essays in the History of Science and Learning offered in homage to George Sarton on the occasion of his sixtieth birthday, 31 August 1944.* xiv+597 pp., port., 28 pl., 11 figs. New York: Henry Schuman, 1947. $12.00

Authors of reviews should be sure to include not only the number of pages of the book, but also the number of plates and figures, and the price. In giving the name of the publisher, be *the title page* rather than some abbreviation.

GEORIUS SARTON *Gandavensis*

VOLUME IX, dedicated to Max Meyerhof (650 pp. illustrated), will appear at the end of 1950. Vols. I to VIII were published from 1936 to 1948.

Each volume contains a collection of memoirs on the history and philosophy of science; most of them are in English, some in French, German, Italian, and Spanish.

Price of each volume $8 (bound copies $9). The prices will probably be raised after 1 July 1951, since the editions are very small.
